

## Gas Analysers

✚ Portable Gas Analyser Systems for CO<sub>2</sub> measurement.

✚ Portable systems are complete with useful carry case

✚ 0-30% and 0-100% systems are available in the portable range.

✚ Wall mounted in line systems are available.

✚ Wall mounted systems are simple to install and operate

✚ Systems are available for CO<sub>2</sub>, oxygen, carbon dioxide, argon and many other gases are available

✚ Desk top systems and rack mounted systems are available for most applications

# BSL Gas Technologies Limited

Industrial Gas Solutions*

## Analytical and Gas Detection Equipment

The BSL Gas Technologies Limited range of gas analysers is extensive.

All are robustly constructed, some are portable, others are fixed and wall mounted and our range includes rack mounted assemblies that can be built into larger panel types.

Continuous monitoring of mixed gas service supply line in a welding application, analysing the mixed gas supplied from a Cellar Dispense

Panel and MAP testing in a Food Packing process are just some of the applications catered for in the equipment range

Some systems are complete with high speed printers and all in the range are proven to be reliable and easy to use. Gases catered for include CO<sub>2</sub>, H<sub>2</sub>, O<sub>2</sub>, Carbon Monoxide, Nitrogen and many more.

Rack mounted systems of various types are also available
