

BSL Gas Technologies Limited

Mixing Knowledge and Resource Delivering Thought Provoking Industrial Gas Solutions

Leak Detection Systems

- + Purpose - Leak detection and line monitoring for most food packaging and industrial gas mixing solutions
- + Construction - Robust packaging with high specification components
- + Installation - Simple to install and simple to install
- + Maintenance - Wall mounted panel and removable cover gives easy access to all parts for on site servicing
- + Flow indication gives the operator visual indication of system leaks.

Gas Mixing Leak Check Systems

A range of panels designed to help in the detection of gas leaks in ring mains or supply pipelines. Panels contains a leak divert loop and a flow-meter.

When the plant is not in use, the supervisor can switch the panel to leak mode and obtain an indication of the flow of gas leaking from the calibrated flow-meter.
