

WHY CHOOSE A BSL MIXER FOR MIXED GAS DISTRIBUTION?

GAS MIX CHOICE:

Unlike pre-mixed cylinder gases, a BSL Gas Mixer offers a wide range of gas mix options to suit your needs!

PRE-SET, ADJUSTABLE MIXERS:

Our mixers offer pre-set and adjustable options, ensuring greater control over process integrity and demand.

PROCESS INTEGRITY:

BSL provides tamper-evident labels to ensure both process integrity and control.

FLEXIBILITY IN PROCESS VARIATION:

Our mixing modules facilitate the delivery of mixed gas variations while maintaining control over the installation's integrity.

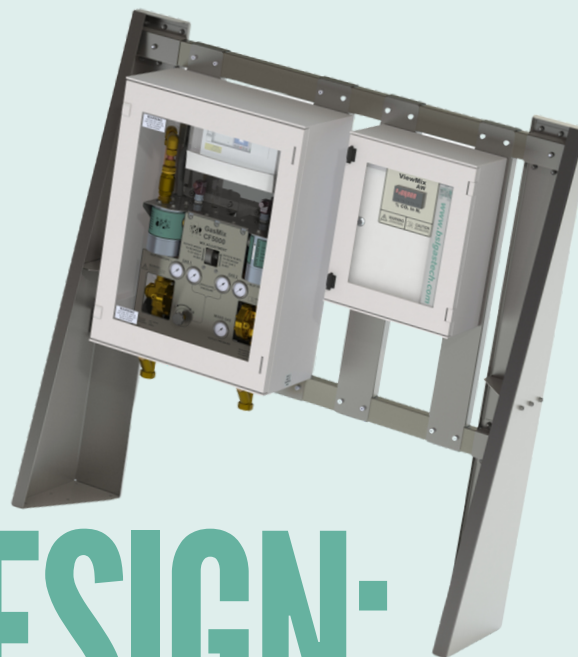

CONTINUITY AND GROWTH:

A BSL system allows for easy expansion, enabling you to accommodate for future growth and demand.

MODULAR DESIGN:

Our gas mixers feature a modular design, allowing for the addition of further elements as needed (without the need to purchase larger systems in advance!)

SIMPLIFIED INSTALLATIONS:

We've simplified our installation process by removing the need for electricians or buffer tanks!

EASY GAS HANDLING:

Our systems take pure gases and provide a regulated, protected supply for the mixer, making gas handling convenient and safe!
